REMARKS

The figures of births and deaths shown in this statement for week ending the 12th May 1956 relate to 186 towns with an estimated population of 26,416 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 59% of the total number of towns representing 64% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 13,368 and 6,325 representing birth and death rates of 26.3 and 12.5 per thousand of population respectively.

(a) States (Part A and C).—The data here relate to 151 towns with an estimated population of 21,187 thousands. Information about Assam, Bihar, Delhi, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 60% of the total number of towns representing 63% of the

total population is covered. The number of births and deaths recorded in these towns were 11,296 and 5,377 representing birth rates and death rates of 27.7 and 13.2 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of the population.

(b) States (Part B).—The data here relate to 35 towns with an estimated population of 5,229 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 54% of the total number of towns representing 65% of the total population is covered. The number of births and deaths recorded in these towns were 2,072 and 948 representing birth and death rates of 20.6 and 9.4 per thousand of population respectively

No town recorded a high death rate of 50 or over per thousand of population.

\*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

Explanation of symbols used :—B. = Births ; B.R. = Birth Rate ; C. = Cholera ; S. = Smallpox ; P. = Plague ; F. = Fevers ; D.D. = Dysentery and Diarrhoea ; R.D. = Respiratory Diseases ; M.D. = Maternal Deaths ; D.R. = Death Rate ; I.D. = Infantile Deaths (included in total death) ; .. = Nil information.

## REMARKS

The figures of births and deaths shown in this statement for week ending the 19th May, 1956, relate to 211 towns with an estimated population of 32,960 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 67% of the total number of towns representing 79% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,204 and 8,259 representing birth and death rates of 25.6 and 13.0 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 172 towns with an estimated population of 27,135 thousands. Information about Andhra, Assam and Bihar, could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 68% of the total number of towns representing 81% of the total population is covered.

The number of births and deaths recorded in these towns were 13,718 and 7,235 representing birth rates and death rates of 26.3 and 13.9 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 39 towns with an estimated population of 5,825 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 60% of the total number of towns representing 72% of the total population is covered. The number of births and deaths recorded in these towns were 2,486 and 10,24 representing birth and death rates of 22.2 and 9.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
